Summary

AI Engineer with 4+ years shipping production GenAI & LLM systems (text-to-SQL analytics agents, RAG, multi-agent pipelines, data lakes) for enterprise clients in finance, pharma retail, manufacturing, metals & logistics on AWS & Azure, and leading agentic AI programmes from scoping through delivery.

Experience

AGR Knowledge Services Pvt. Ltd. **Mar. 2024 – Present**
AI Engineer (SDE 3) *Mumbai*

Tender AI: Multi-Agent Bid Lifecycle Platform *Python, LiteLLM, PostgreSQL, OCR, RAG*

- Built a 10-agent tender-management platform for a Singapore SaaS vendor spanning a nine-stage bid lifecycle: portal intake and extraction, bid/no-bid scoring, cited proposal drafting, compliance checks and submission.
- Kept deterministic costing and scheduling engines separate from LLM reasoning, with orchestrator-enforced human approval gates that log who decided, when, on what evidence and why.
- Built a provider-agnostic model gateway with tiered routing, failover and a self-hosted no-egress lane, plus row-level multi-tenant isolation and an eval harness gating releases on a 100+ tender golden set.

Agentic AI Programme for Logistics Operations *Python, Claude, pdfplumber, openpyxl*

- Delivered an agentic AI programme for a logistics software client (ISO tank, NVOCC, freight forwarding across 4 countries), reconciling 98-agent requirement lists against 19 SOPs and 24 process flows into a ∼320-objective register.
- Phased the build into rule-based agents on system data, email and WhatsApp (43), AI document reading, forecasting and customs/port/carrier integrations (43), and 17 agents held with stated reasons.

Financial Data Lake & Quantitative Analytics Platform *Python, AWS S3, AWS Glue, Apache Iceberg, Parquet*

- Engineered a Bronze > Silver > Gold Apache Iceberg data lake for tick-level NIFTY/BankNIFTY derivatives data, cutting backtest query time by **90%** versus flat-CSV workflows.
- Built distributed ETL pipelines computing options Greeks and Implied Volatility for quant research and backtesting.

Natural-Language Analytics & Dashboard Copilot (MCP-LLM Bridge) *Python, Claude, MCP, PostgreSQL, React*

- Built a code-executing LLM agent that lets business teams query their data warehouse in plain English, discovering the schema, writing and running SQL step by step, and returning charts with a visible reasoning trace (**80%** fewer data requests).
- Built a self-serve dashboard builder that turns natural-language prompts into charts, tables and KPI tiles, with LLM or SQL modes, forecast queries and auto-generated summaries.

Multi-Agent Market Intelligence Platform *Python, FastAPI, Azure OpenAI, LangGraph, AKS, PostgreSQL*

- Built a LangGraph multi-agent platform routing queries across RAG for unstructured data and dynamic SQL synthesis for structured data, with LLM-as-a-Judge agents checking SQL correctness, retrieval relevance and hallucinations.

Cost Intelligence & Procurement Copilot *Python, FastAPI, AWS Bedrock, MongoDB, Weaviate, Cohere*

- Built an LLM copilot over hierarchical Excel cost sheets with hybrid retrieval (MongoDB lexical, Weaviate vector, Cohere rerank), cutting supplier-negotiation prep from **15 days to 1 day** and BOM comparison from **4 hours to 15 minutes**.

Indian Oil Corporation Limited **Jan. 2023 – Mar. 2023**
Software Engineer Intern - AI *Mumbai*

- Engineered the **Swadhyaya Mitra** MIS portal (Java Spring Boot, OracleDB, Flutter) centralizing e-L&D records, adding a scikit-learn model trained on past training cycles (progress, login activity, days to deadline, shift pattern) to flag employees likely to miss mandatory training; role-based dashboards cut audit effort by **50%**.
- Prototyped an on-premise semantic course search over the L&D catalogue using sentence-transformer embeddings, letting employees find relevant training by meaning rather than exact course titles.

SupportHives Technology LLP **Mar. 2021 – Jun. 2022**
Jr. DevOps Engineer *Mumbai*

- Ran DevOps and early MLOps for 10+ client environments on AWS and Azure at **99.9%** availability, containerizing and deploying ML models (Docker, SageMaker) and automating releases with Git and shell scripting, cutting production downtime by **40%**.

Education

Thakur Institute of Management Studies, Career Development & Research **Nov. 2021 – July 2023**
Master of Computer Applications (MCA), CGPA: 9.47, Score: 82.93% *University of Mumbai*

Sheth L.U.J. College Of Arts And Sir M.V. College Of Science & Commerce **June 2018 – May 2021**
Bachelor of Science in Computer Science (BSc. CS), CGPA: 9.7, Score: 79.97% *University of Mumbai*

Technical Skills

Languages: Python, Java, Golang, TypeScript, JavaScript, SQL, Bash
AI/LLM Tooling: OpenAI, Claude, Cohere, LangGraph, LangChain, LiteLLM, RAG, Text-to-SQL, MCP, Multi-Agent Systems
Cloud & DevOps: AWS (Bedrock, S3, EC2, Lambda, Step Functions, ECS, Glue, Batch), Azure (AKS); Docker, CI/CD, Git, Vercel
Data & ML: Apache Iceberg, Apache Parquet, PySpark, Pandas, NumPy, Statsmodels, openpyxl, pdfplumber, Selenium, Playwright
Frameworks & Tools: FastAPI, Flask, Spring Boot, React.js, Next.js, Node.js, Tailwind, Flutter
Databases: MongoDB, PostgreSQL, MySQL, Redis, Qdrant, Weaviate, pgvector, Redshift

Certifications & Awards

- McKinsey Forward Program, Core Skills (2026, in progress)
- Deep Learning Specialization, DeepLearning.AI (2026, in progress)
- Best Research Paper, ICAIM 2023 (published in STM Journals)
- Outstanding Adaptability Award, AGR 2025
