SUMMARY

Product-focused AI engineer with four years in tech delivery, three of them owning AI and data products end to end: BRDs/PRDs, stakeholder alignment, developer direction and production delivery. Built fintech and market-data products for Nuvama Wealth and platforms live at EGA and Al Jazeera Steel. Author of a product proposal for **WhatsApp Pay India**.

EXPERIENCE

AGR Knowledge Services Pvt. Ltd. **Mar. 2024 – Present**
AI Engineer (SDE 3) *Mumbai*

- **SEBI-Compliant Market Surveillance Tool** | *FastAPI, MongoDB, React.js, BSE/NSE APIs*
  - Delivered AGR's surveillance product for **BSE & NSE top 250** companies, translating market-risk needs into actionable product rules.
  - Translated SEBI reporting obligations into detection rules with compliance stakeholders, making regulatory needs buildable.
- **Market Data Lake | Nuvama Wealth** | *Python, AWS, Apache Iceberg*
  - Cut backtest query time **90%** by moving **5 years** of NSE and BSE market history off flat files into a queryable store.
  - Built a pre-processed **F&O data layer** with validation and derived metrics such as **Greeks and implied volatility**, ready for the backtesting engine.
- **Cortex360, Market Intelligence Platform** | *GoLang, FastAPI, React.js, Azure OpenAI*
  - Defined a self-service dashboard workflow that cut report turnaround **70%**, reducing analyst dependency on engineering.
  - Live in client production at **EGA** and **Al Jazeera Steel**, surfacing **15 years** of history for demand and sales forecasting.
- **Procurement Copilot | Brakes India** | *Python, FastAPI, AWS Bedrock*
  - Cut supplier-negotiation prep from **15 days to 1 day** and BOM comparison from **4 hours to 15 minutes**.
  - Defined source-traceability as a product requirement so procurement users could validate every answer before sign-off.

Indian Oil Corporation Limited **Jan. 2023 – Mar. 2023**
Software Engineer Intern *Mumbai*

- Cut training audit effort **50%** on the **Swadhyaya Mitra** MIS portal by scoping reporting with the L&D team around what auditors had to produce.

SupportHives Technology LLP **Mar. 2021 – Jun. 2022**
Technical Support Engineer *Mumbai*

- Ran client projects end to end across **10+ environments**: scoping, sequencing, timelines and handover.

PRODUCT CASE STUDIES

WhatsApp Pay India: Product Proposal | *UPI, Group Payments, Credit, UX*

- Field-tested WhatsApp Pay against Google Pay and found it cannot process **UPI-ATM cash-withdrawal QR codes**; prioritised UPI-ATM so users stop switching apps.
- Designed **Group Money**: savings circles run with registered chit companies over UPI AutoPay, plus split-and-settle, with flows, metrics, guardrails and legal risks.
- Proposed a gig-worker income tracker that builds a consented credit record, and a payment-status screen fix.

Digital Lending App Teardown & PRD | *User Research, Funnel Analysis, Competitor Analysis*

- Mapped the onboarding-to-first-transaction funnel through user sessions, benchmarked **KreditBee, Navi and moneyview**, and wrote a PRD linking the top fix to **contribution margin per loan**.

PROJECTS

RuCards, AI Discovery Layer | *FastAPI, React, Qdrant* | *In development*

- Replacing category-filter browsing with natural-language search and recommendations across a **100-product** catalogue, so users describe what they want.

Ambadnya, OTT Streaming Platform | *Flutter, FastAPI, AWS*

- Took a client's streaming product to market on web and Google Play, directing **4–6 developers**.

EDUCATION

Thakur Institute of Management Studies, Career Development & Research **Nov. 2021 – Jul. 2023**
Master of Computer Applications (MCA), CGPA: 9.47 *University of Mumbai*

Sheth L.U.J. College Of Science & Commerce **Jun. 2018 – May 2021**
B.Sc. Computer Science, CGPA: 9.7 *University of Mumbai*
